Dear Wayland,

Please send us the contact information for the person who we need to speak to about the technical aspects of the event.

We will need information about the following:

For Sound:

the sound system for the screen at the back of the gym
the sound system that plays over the speakers in the whole gym
the sound for the five monitors that are suspended towards the front of the gym

For image:

information about plugging image into the five monitors (we have sync boxes we can use to synch them all up)
what format we need to use to play video off the main screen at the back of the gym

Thanks so much.

All the Best,

Lynn
